* Access to these sites STRICTLY ONLY by designated monitor(s).

**Probable access with other trained monitor ONLY.

Ringland/Attlebridge/Fakenham 1 understand to be public access.

 \checkmark n = successful sample.

✓ = overall count below trigger level.

Locations/coordinates/what3words at some sites approximate. Some of these are the access points/car parking. This can be included in the comments section of site registration. The actual site location in the watercourse would be preferred. N = ARMI count.

Wheatfen Freshwater Group continue sampling Yare at Stoke Road , in Norwich. Last score OK.

*Pensthorpe Site was sampled on 2nd October and a count of 6 achieved which was considered low. The repeat visit on the 9th Oct improved the count and David Harper considers some small cased caddis may have been missed on 2nd Oct.

Fakenham (x2) and Pensthorpe sampled with water levels high. Restricted access in deeper water so most 3 min sample taken in margins.

Chris Bone now has access as assistant co-ordinator. He has uploaded Pensthorpe & Fakenham x2 sites into database. I have uploaded previous samples and he those for 2024.

Sarah Gelpke has left Norfolk Riverstrust so no longer available to support.
